

• **WE OFFER THE HIGHEST QUALITY, MINIMUM ABERRATION!** •

With superior optical qualities, acrylic has 15% better light transmission than glass.

• **LIGHTER IN WEIGHT, LOWER PRODUCTION COSTS** •

At half the weight of glass, saves fuel costs and increases performance.

• **STRAIGHTFORWARD, HASSLE-FREE INSTALLATION** •

Acrylic will not shatter or become structurally weakened by drill holes.

• **EXCEPTIONALLY DURABLE HARD COATING** •

Sustains repeated exposure to salt, weather elements, and will not wear under wiper use.

ENERGY EFFICIENT HULLSIDE WINDOWS

As boat designs get larger and more complex in their layouts, Hullside and portlight windows have become an important and integral part of vessel design. Very much in vogue is the ideal to create windows allowing the inflow of daylight so as to really open up the space below. You can choose from eight different tinting shades. A variety of shades to suit every design application and individual customer preference.

RESILIENT, WATER-TIGHT LIVE BAIT WELLS

Live Bait Wells are a great addition to any boat which offers fishing kit and accessories as part of the main layout. For the keen fishing enthusiast, a fishing well is a “must-have”. AcryliCo offers an array of sizes and design concepts to suit any modern boat layout.
